-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 5-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Thurgate et al., U.S. Patent 6,255,165.

Thurgate et al. shows the invention as claimed including a semiconductor memory device comprising: a semiconductor substrate 302 including a source/drain (314,316) and a channel region; a tunnel oxide film 304 formed on the channel region of the semiconductor substrate and having side walls; a floating gate 308 formed on the tunnel oxide film and having side walls; a first insulating film 310 formed on the floating gate and having sidewalls; a control gate 312 formed on the first insulating film and having side walls; and a second insulating film 307 formed on the control gate, wherein: the side walls of the tunnel oxide film are at least partially receded from the sidewalls of the floating gate; and the second insulating film 307 covers the side walls of the tunnel oxide film, the side walls of the floating gate, the side walls of the first insulating film and the side walls of the control gate (see figs. 3a-3g and col. 6-line 58 to col. 7-line 57).
